

CHOICE

All Temperature Machine Detergent

PRODUCT DESCRIPTION & BENEFITS

CHOICE is our finest liquid all temperature, non-chlorinated machine warewashing detergent. No other liquid available features such dish cleaning power and water hardness control. CHOICE is a unique combination of high alkalis, polymeric water softeners including a “threshold agent” and corrosion inhibitors that makes machine dishwashing even heavily soiled items easy and efficient. Although CHOICE is non-chlorinated, it cleans so well that corrosive chlorine is unnecessary, saving your machine! Due to its alkaline strength CHOICE is not safe for aluminum or real silver and these items should be avoided. CHOICE is extremely concentrated and may be used at very economical use levels. Even at high dilution, the “threshold agent” contained controls hard water build-up on the dishwasher..

DETAILED USAGE & INSTRUCTIONS

LOW TEMPERATURE DISHWASHERS: Adjust dispenser (pump) to deliver 3 to 7 cc per 1 1/2 to 2 gallons of water in the wash cycle. For softer or hotter water with less soil load, add less detergent. For harder or cooler water or with heavier soil loads, add more detergent.

CONVERTED HOT MACHINES: Maintain 150 to 300 ppm available alkalinity depending upon water hardness and soil conditions.

Refer to the product label or contact a Cynamic Chemical Co. professional for additional usage instructions.

TECHNICAL SPECIFICATIONS

Appearance / ColorRed
Odor.....Odorless
Shelf Life2 years
Solubility in WaterComplete
FoamingNone
pH14.0
Specific Gravity1.170 ± 0.005
Storage Temperature.....45-110 °F

FEATURES & BENEFITS

- Incredible Cleaning Strength
- Keeps Machine and Racks Scale-Free
- Non-Chlorinated to Protect Machine
- Very Economical Use Levels
