

# LOW TEMP SANITIZER

Sodium Hypochlorite Solution  
EPA Reg No. 33981-20004-91509

## PRODUCT DESCRIPTION & BENEFITS

**Low Temp Sanitizer** is a sodium hypochlorite solution that may be used for the final rinse in low temperature dishwashers at levels required by Local Health Authorities. Low Temp Sanitizer may also be used as a sanitizer for non-porous food contact surfaces, such as in the last rinse sink of a 3-compartment sink system for pots and pan and utensils. Please consult the label for all its uses.

## USAGE & INSTRUCTIONS

Before use as a sanitizer, food products and packaging materials must be removed from the room or carefully protected. Prior to application, remove gross food particles and soil by a pre-flush or pre-scrape and when necessary, pre-soak. Then thoroughly wash or flush objects with a good detergent or compatible cleaner, followed by a potable water rinse before application of the sanitizing solution.

Check with your Cynamic Chemical Co. Sales Representative for detailed use directions and which states LTS is available in.

### TECHNICAL SPECIFICATIONS

Appearance / Color .....Light Yellow  
Odor.....Chlorine  
Shelf Life .....2 years  
Foaming .....None  
Solubility in Water .....Complete  
pH .....12.0 ± 0.5  
Specific Gravity .....1.104 ± 0.005  
Storage Temperature .....45-90 °F

### FEATURES & BENEFITS

- Disinfects and Sanitizes
- Food Contact Sanitizing Performance
- Sanitizes Porous and Non Porous Surfaces
- Destains and Deodorizes
- 5.25% Hypochlorite Solution
