

OXI-BRITE

Powdered All Color Fabric Destainer

PRODUCT DESCRIPTION & BENEFITS

OXI-BRITE is an incredible oxygen based stain remover designed to replace normally harsh, destructive chlorine type bleaches for safe use on colored, permanent press or delicate fabrics. Excellent for use in hard water areas where iron or other minerals interfere with chlorine bleaches, causing yellowing or other discoloration.

Excellent for use as a:

- As a Booster for Heavy Soils.
- Pre-Spray/Pre-Soak
- Stain Remover (including stubborn protein based stains, such as grass, food, juices, etc.)

DETAILED USAGE & INSTRUCTIONS

NOTE: If colorfastness of fabric is unknown, test by applying a small amount of product to an unexposed area. If color bleeds, wash separately and **DO NOT** use a bleach or destainer.

BLEACH CYCLE: Add 2 oz. of product to the wash wheel per 35 lbs. dry linen. Avoid spilling product directly on linens as spotting may occur. If fabric spotting occurs, soak in a solution of “tannin spotter” or white vinegar.

PRE-SPRAY: Dilute 1 oz. destainer with 16 oz. water. Spray directly on linens. Tough spots may require a stronger solution.

PRE-SOAK: Use 1 oz. per gallon of warm water. Whites/pastels should always be soaked separate from darker fabrics. Allow to soak 30-60 minutes.

BOOSTER FOR COLORED LINEN: As a booster for colored linen with heavy soils add 2 oz. per 35 lbs dry linen in the bleach cycle.

Refer to the product label or contact a Cynamic Chemical Co. professional for additional usage instructions.

TECHNICAL SPECIFICATIONS

Appearance / ColorWhite
Odor.....Odorless
Shelf Life2 years
Solubility in WaterComplete
FoamingNone
Storage Temperature.....45-110 °F

FEATURES & BENEFITS

- Excellent For Use as a Booster for Heavy Soils
- May Be Used as a Pre-Spray or Pre-Soak
- Removes Tough Protein-Based Stains
