

PLASTISOAK

Powdered Plasticware Presoak

PRODUCT DESCRIPTION & BENEFITS

PLASTISOAK is an oxygen releasing compound designed to remove stains from plasticware and china. Regular use will keep plastic dishes, cups and trays shiny and stainfree. In institutions with a large amount of plasticware, it can be used directly in the dishwasher. It contains corrosion inhibitors to protect delicate machine parts. These same corrosion inhibitors make it an excellent product for use in stainless steel and aluminum coffee urns to remove rancid oils and tannin.

DETAILED USAGE & INSTRUCTIONS

Sink #1 (Wash Tank): Fill with hot water (110°F) and detergent at the rate of 1/4 - 1/2 ounce per gallon of water, depending on soil level.

Sink #2 (Rinse Tank): Fill with clean water (110-120°F).

Sink #3 (Sanitizing Tank): Fill with hot water and No Rinse Sanitizer.

Dishwashing: Submerge scraped utensils in Wash Tank. Allow to soak. Scrub utensils (inside and outside) with pot brush or scouring pad. Rinse thoroughly in RINSE Sink. Immerse Time: 30 Seconds. Place utensils in SANITIZE Sink. Immerse Time: 1 Minute.

Change detergent solution as soil load becomes apparent. Change rinse water often. Test sanitizer solution periodically and change as needed to maintain required sanitizer/water ratio or when water becomes visibly dirty.

Refer to the product label or contact a Cynamic Chemical Co. professional for additional usage instructions.

TECHNICAL SPECIFICATIONS

Appearance / ColorAmber
OdorLemon
Shelf Life2 years
Solubility in WaterComplete
FoamingNone
pH8.5 ± 0.05
Specific Gravity1.020 ± 0.005
Storage Temperature.....45-110 °F

FEATURES & BENEFITS

- Safe—Will Not Deglaze Plastics
- Destains
- Keeps Plasticware Serviceable Longer
- Deodorizes
